

Course Name	ADVANCED ESTHETICS - 150 HOURS
Description	Our comprehensive Esthetics program includes instruction not only in esthetic treatment procedures and services, but in areas such as the structure of the skin and its function, disorders of the skin, and professional business skills. In addition to technical skills, students learn hands-on by participating in clinical experiences. During clinical, students practice their skills at either their home or in our on-site beauty salon where they work on mannequins or schedule appointments with “clients”, sanitize equipment, perform services and keep accurate records.
Objective	The objectives of the Advanced Esthetics program are to prepare students with advanced techniques giving students the advanced training needed to enter into the chosen profession with the knowledge to compete with licensed professionals. Training encompasses three types of learning; theoretical knowledge - the foundation of the student’s education; practical experience - the application of knowledge, and professional business building skills which are vital for the student’s success. Each phase of the students’ education emphasizes a different combination of learning approaches. The program is taught using several different types of instructional methods such as lectures, distance learning education, videos, hands-on techniques, demonstrations, whiteboards, and internet research. All programs are offered in the English language only.
