

Course Name	ADVANCED MANICURING – 100 HOURS
Description	Our Advanced Manicuring program is more than just learning how to perform a manicure or do nail art. We have created a curriculum that focuses on the care and maintenance of nails along with training time and customer service that is meant to help you build your own success. In addition to technical skills, students learn hands-on by participating in clinical experiences. During clinical, students practice their skills at either their home or in our on-site beauty salon where they work on mannequins or schedule appointments with “clients”, sanitize equipment, perform services and keep accurate records.
Objective	Students gain Advanced knowledge and skills used in the manicure and nail technology field through courses such as studying of nail disorders, nail enhancement, manicures and pedicures. Training encompasses three types of learning; theoretical knowledge - the foundation of the student’s education; practical experience - the application of knowledge, and professional business building skills which are vital for the student’s success. Each phase of the students’ education emphasizes a different combination of learning approaches. The program is taught using several different types of instructional methods such as lectures, distance learning education, videos, hands-on techniques, demonstrations, whiteboards, and internet research. All programs are offered in the English language only.
